TOP TWENTY TIPS FOR ROO6: BASED ON THE CHIEF EXAMINERS REPORT 2014

1. Check the specification for the **list of research methods to use**
2. From this list use a range, **three or more**
3. Provide **research that supports and informs your designs**, the reason why
4. **Relate this research back to the scenario**, your plans
5. Include a final design of your images
6. To get top marks the designs must be '**clear and detailed'**, plans must be sufficient for someone else to follow and implement
7. Store the **original images in a suitable folder / folders**
8. **Use suitable file names**
9. In LO2 you need to **set the resolution as well as image size**,
10. Set / Adjust the Canvas **before** you create the image
11. Use a wide range of techniques and skills
12. The final image alone often does not effectively evidence all the techniques that have been used
13. You must ensure that you show the tools and techniques you have used
14. **Include versions of the works or screen shot and annotations**
15. **DO NOT** create extensive step-by-step screenshots
16. Provide evidence of the files being stored
17. Use suitable 'professional' file / folder names
18. Discuss how the final images will be presented and explain why i.e. , printed, saved
